April 2019

Patients with Chronic medical conditions are at high risk for

PNEUMOCOCCAL DISEASE

Researchers are studying an investigational vaccine to see if it could help fight infections that can cause pneumococcal disease.

You may qualify to join this study if you are between **18 and 49 years of age** and you have at least one of the following chronic medical conditions:

- **Confirmed diagnosis of chronic heart disease.**
- **Confirmed diagnosis of Chronic Liver disease.**

Those who qualify may receive:

- Payment up to \$500 to help cover the cost of travel and time.
- No-cost study related care from the Physician.
- No-cost study vaccine.

The study doctor will review other criteria with you that may determine whether you can participate in the study. It's quick and easy and there's no obligation to participate.

To see if you qualify, Visit or call us today- enrollment is limited.
